1. PUBLIC COMMENTS:

2. LAND USE PERMIT: PUBLIC HEARING

- 2a. DOFF COOKSEY (Applicant and Owner), County File #LP17-2006: The applicant requests approval of a Land Use Permit to establish an existing crop dusting business. The operations of the business includes aerial application and ground spraying serving agricultural properties in the area or in the region. There are three helicopters used for the aerial application and two ground rigs. The helicopters and ground rigs are stored within existing buildings on-site. Before each spraying job, the chemicals needed for the application will be delivered to the subject property the day before or the day of the application. All chemicals will be stored in a locked area within one of the existing buildings until they are delivered to the job site. The chemical is loaded on the property being sprayed and any unused portion is returned to the farmer. Spraying occurs when weather conditions are optimal for the application and aerial spraying occurs during daylight, but occurs in the early morning for the ground rig. This project also includes establishing existing buildings used for the helicopters, storage buildings, and fuel tanks. The project also involves the construction of a new storage building approximately 2,000 square feet and construction of a future modular office, approximately 504 square feet, and establishing nine parking spaces for the proposed project. The applicant is seeking a variance for a 35-foot side yard setback (where a minimum 50 feet is required) to establish the existing buildings and to allow construction of the proposed buildings, and to allow gravel material for the proposed parking (where asphalt or Portland cement binder pavement, or similar paving material is required). In addition, the applicant also seeks an exception from the County's collect and convey requirement. The subject is located at 7911 Balfour Road in the unincorporated Brentwood area of the County. CEQA: The Zoning Administrator will consider the adoption of a Negative Declaration and related findings for this project.
