**HOW TO GET A BUILDING PERMIT FOR
A DWELLING ADDITION
in the cities of
Lafayette, Moraga and Orinda**

Prepare 3 sets of plans for Moraga and Orinda, and 4 sets of plans for Lafayette. Plans should be drawn to 1/4" = 1'-0" scale on paper 18" x 24" min. and must be of sufficient clarity to indicate the nature and extent of the work. Building designs must meet current building codes (2013 CBC, CRC, CMC, CPC, & CEC) and Title 24 energy design requirements.

The drawing should include the following:

- A complete plot plan showing the entire lot, with all existing buildings and proposed additions, and the distances from each building to other buildings and property lines. All property lines and corners must be set in relation to the project by a licensed surveyor.

- Note: The maximum allowed slope of a driveway is 20%. If you have questions, call Grading Inspection staff at (925) 674-7200.

- A foundation plan and details. Show the foundation sizes, reinforcing steel and anchor bolts. Some areas of the County may require a soils engineer's report.

- A floor plan of the existing house and the new addition, including room dimensions, locations and sizes of windows and doors.

- The plans should show the locations of new electrical receptacles, light fixtures, switches, and

plumbing fixtures. The locations and sizes of existing and/or new main electrical service panel and furnace or heating appliances should be shown.

- A roof plan.

- A framing plan of roof and floors showing size and spacing of all beams, floor joists, rafters, headers, bracing, floor and roof sheathing, roof covering, insulation and interior finish. Include a floor plan showing location of shear walls and tie downs.

- All elevations (views), cross section(s) and construction details of the building.

Provide 2 copies of Title 24 Energy Compliance forms and calculations.

Provide 2 copies of any engineering calculations and details.

Provide 2 copies of soils report if applicable or available.

Plans must be stamped by the applicable city planning department prior to review by the Building Inspection Division:

Lafayette 3675 Mt. Diablo (925) 284-1976 #210

Moraga 350 Rheem Blvd.(925) 888-7050

Orinda 22 Orinda Way (925) 253-4210

Plans must be stamped by the sanitary district

serving the property:

Contra Costa Central Sanitary (925) 228-9500
(All Central County, except Clayton)

C.C.C. Environmental Health (925) 646-5225
(Any properties with septic systems)

A school district fee, based on square footage, is levied on additions over 500 sq. ft. in area and is collected by the Building Inspection Division at the time of permit issuance.

A grading permit is required if moving 200 cubic yards of soil or more, cutting more than 5' below grade, or filling more than 3' at deepest point. You will need 4 sets of plans stamped by a licensed civil engineer, a soils report, an estimate of the cost of grading work, volume of earth to be moved and completed grading permit application. In the cities of Orinda and Moraga, a permit is required if moving 50 cubic yards of soil or more.

If you are a homeowner undertaking a do-it-yourself project, you must provide proof of property ownership and complete an owner/builder verification form. If you have a general contractor, he or she may obtain the building permits.

Many permits for residential construction can be issued the same day provided that the proper agency approvals have been obtained, i.e., planning, health, school, etc. Large, complex, new residential projects may require review by our engineering staff. This review may take several weeks.
