1. Plan shows modifying existing inlet, but this plan can be used in new construction.
2. For Manhole, General Notes and Details, see Standard Plan CD35.
4. Distance varies depending on depth to any existing side opening, minimum 6" below new top slab.
5. Manhole cover frame shall be adjusted to conform to finished grade and cross slope of pavement.
6. Dowels shall be placed in 1/2" diameter drilled holes with 1/2 sand cement grout.
7. Length of "diagonal" bars varies depending on top slab dimensions. The bars shall extend over existing inlet base walls with 2" clearance to edge of slab.
