Maximum heights for each marked area shall not exceed the heights set forth in this map. Locations of marked areas shown above are approximate. High points and Low Points of each lot reflect proposed (finish) elevations.

NOTES: The maximum heights for each building in this map reflect the preliminary designs submitted to the County, plus one-half foot of additional height to allow for the construction plan margin of error that is generally needed when utilizing preliminary (schematic) designs. Construction level plans would be submitted and reviewed post County Approvals, as applicable.
