MEDIA ALERT!

**Contra Costa Water District to Close Marsh Creek Road
Due to Water Break**

October 5, 2018, Clayton, CA – Contra Costa Water District has discovered that their 12-inch water line under Marsh Creek Road West of Morgan Territory Road is leaking and they have not found the location of the leak.

The water is flowing out of the hill below the road and they are currently attempting to locate the leak. The Water District will close the westbound lane tonight at 7:00 PM to continue that effort. They will have a geotechnical expert respond to assess the stability of the road base and sub base.

Contra Costa County Public Works will inspect the roadway after the leak is discovered and repaired. We do not have an estimated time to reopen that section of Marsh Creek Road at this time. Please take alternative routes to avoid this area.

About Contra Costa County Public Works Department:

Contra Costa County Public Works Department (CCCPWD) maintains over 660 miles of roads, 150 miles of streams, channels and other drainage and over 200 County buildings throughout Contra Costa County. CCCPWD provides services such as Parks and Recreation, Sand Bag Distribution and Flood Control throughout unincorporated areas of Contra Costa County. To learn more about CCCPWD, please visit us [here](#).
