

Announcement regarding Land Use Permit application, County File #LP19-2019:

The Contra Costa County Department of Conservation and Development (DCD) has determined that additional environmental review is required for the Powerdrive Oil and Gas Wells Project (County File #LP19-2019) located approximately 2,600 feet south of the corner of Heidorn Ranch Road and Old Sand Creek Road and approximately 980 feet northwest of St. Regis Court in unincorporated Brentwood (Project). DCD will prepare a revised draft environmental document and anticipates making it available for public comment in October of 2020 (subject to change). Everyone who commented on the previous draft environmental document will receive a notice when the revised draft environmental document is available for public comment. Once the public comment period on the revised draft environmental document has concluded, a public hearing to consider the project will be held.
