

Project Update For  
*Danville Boulevard and Orchard Court Complete Streets Improvement*

Figure 1. - Roundabout Paving

**UPDATE:**

Contractor has finished paving the first half of the roundabout. Streetlights have been installed and are illuminating the project. The traffic control plan will be reconfigured next week, information regarding this change can be found at the project website listed below.

**About the project:** The Danville Boulevard and Orchard Court Complete Streets Improvement project will improve safety of vehicle, bicycle, and pedestrian traffic along Danville Boulevard by incorporating the following improvements along the corridor:

- Improving and widening existing sidewalks and providing bicycle facilities along this segment of Danville Boulevard.
- Providing curb extensions and curb ramps compliant with the Americans with Disabilities Act
- Improving pedestrian crossings by shortening the overall length of the crosswalks and providing pedestrian refuge areas in the road medians.
- Constructing a roundabout at the intersection to reduce vehicle speeds and conflicts while maintaining movement of traffic through the intersection.
- Reconstructing sidewalks that will accommodate many of the existing mature trees along Danville Boulevard.
- Providing landscaped greenspace along the project corridor and in the roundabout center.

The project will also include drainage improvements, utility relocations, landscaping improvements, and electrical work. Access to roads and driveways will be maintained throughout the construction of the project.
