

## Chapter 2

# Comments and Responses

## Introduction

This Chapter contains the written comments received on the Draft HCP/NCCP and the draft EIS/EIR and responses to issues raised in the comments. The comments immediately precede the corresponding responses. Table 2-1 below identifies the commenters and the pages on which the comments begin.

Comments were marked to identify the specific issues raised in comment and numbered accordingly in the margin. Comments were given letters (starting with “A”) in the order received. Thus second letter received is identified as Comment “B”. The specific issues raised in comment are then numbered B-1, B-2, etc. Revisions to the HCP/NCCP or the EIS/EIR are described briefly in the responses to comments. The final HCP/NCCP and final EIS/EIR contain the revised text.
